SUMMARY

- 13 years of experience as a .NET Developer, including 1 year of team leadership.
- Specialized in building scalable .NET backend systems for high-load environments in telecom, healthtech, and gambling.
- Delivered a new payment service for a 10M+ user base, increasing company profit by 13% (~\$30M/year).
- Founded and launched an aggregator service for housing search with a turnover of more than 10K dollars per month.

EXPERIENCE

Senior .NET Developer, 2025 – Present

Limassol (Remote)

1xBet – Top-3 betting company in the world

- Spearheaded the migration of core business logic from a legacy .NET Framework monolith to a modern .NET 9 microservices architecture, aiming to improve deployment frequency and system scalability.
- Developed and shipped a new service for conducting and calculating automatic bets, serving a global user base with specific localization requirements for regulated markets.
- Established efficient workflows and best practices for development process, which reduced code merge conflicts, improved overall code quality, and streamlined the release process for the team.

Senior .NET Developer, 2021 – 2024

Moscow (Hybrid)

Beeline – Top-3 telecom in Russia and Central Asia

- Led the backend development of a new "Payments" product, serving 10M+ users and generating an additional 13% (~\$30M) in annual company profit.
- Developed and launched backend for a voice assistant from concept to beta, using .NET and external integrations, and worked directly with product stakeholders.
- Engineered a set of public REST APIs for mobile application, created shared code, libraries, packages and services used in all cross-functional teams.

Senior/Tech Lead .NET Developer, 2019 – 2021

Moscow (Hybrid)

Doctor At Work – Medical social network

- Launched the platform's first monetization feature by integrating an internal currency with payment gateways, increasing audience engagement and the volume of client content.
- Architected and delivered a suite of social features (Channels, Reactions, News Feed) for the platform's messenger application, driving a 40% increase in daily user engagement after release in stores.
- Led a team of 3 developers, establishing code review process and structured task decomposition that improved code and releases quality.

Junior/Middle .Net Full-stack Developer, 2013 – 2019

Moscow (Office)

Realestate.ru – Top-20 real estate service in Russia

- Designed and built the user and corporate client account systems from the ground up, which became the primary interface for over 30,000 active users
- Improved website page load times over 60% by optimizing database queries and smart caching system, leading to better user retention.
- Owned the full development life cycle for key features, from building responsive UI components with JavaScript/KnockoutJS to deploying and maintaining the backend .NET services.

EDUCATION

National Research University "Moscow Power Engineering Institute"

2008 – 2013

Automated Information Processing and Management System

GPA: 4,4 / 5

SKILLS

Backend: .NET, ASP.NET MVC, WEB API, Minimal API, RabbitMQ, Kafka, SignalR, EF Core, Dapper;

Databases: MS SQL, MySQL, PostgreSQL, MongoDB, Redis, Elasticsearch;

DevOps: TeamCity, Gitlab CI/CD, Github Actions, Octopus, Kibana, Grafana, Prometheus, Docker, K8S, .NET Aspire;

Frontend: JS, TS, KnockoutJS, React, CSS, SASS.
